It forms part of the Issuer's design and distribution arrangements for the Fund Product.

- material change to the terms or attributes of the Fund Product which the Issuer reasonably considers indicates that this TMD is no longer appropriate;
- where and when the Fund Product is not being distributed and purchased as envisaged by this TMD which the Issuer reasonably considers indicates that this TMD is no longer appropriate;
- an event or circumstance that would materially change a factor considered in making the TMD for the Fund Product which the Issuer reasonably considers indicates that this TMD is no longer appropriate;
- reporting from distributors of one or more 'significant dealings', multiple distributors of 'significant dealing' (see section 6 below) in the Fund Product or numerous reports from one distributor of 'significant dealings' in the Fund Product which the Issuer reasonably considers indicates that this TMD is no longer appropriate;
- determination by the Issuer of a 'significant dealing' (see section 6 below) in the Fund Product which the Issuer reasonably considers indicates that this TMD is no longer appropriate;

- the use by ASIC or other regulators of Product Intervention Powers, regulatory orders or directions that affect the Fund Product which the Issuer reasonably considers indicates that this TMD is no longer appropriate.

The above Review Triggers do not limit the Issuer's obligations under section 994C(3)(ii) of the Act. When a review trigger has occurred, this TMD will be reviewed within 10 business days.

## 6. Reporting and monitoring this TMD

The following reporting requirements apply to all distributors of the Fund Product:

Reporting requirements	Reporting period
Where the distributor is aware or ought to reasonably be aware, it should report on each 'significant dealing' outside of the target market, under section 994F(6) of the Act (see guidance below) by completing the Notification of Significant Dealing Form and submitting it to: <a href="mailto:targetmarketdistribution@latrobefinancial.com.au">targetmarketdistribution@latrobefinancial.com.au</a> .	As soon as practicable but no later than 10 business days after the distributor becomes aware of the 'significant dealing'.
Distributors must report to the Issuer (at <a href="mailto:targetmarketdistribution@latrobefinancial.com.au">targetmarketdistribution@latrobefinancial.com.au</a> ): <ul style="list-style-type: none"> <li>• if the distributor received complaints in relation to the Fund Product during the reporting period, the number of complaints it received; and</li> <li>• include, with its report, a copy of each complaint (as defined in section 994A(1) of the Act) (to the extent permitted under privacy and other laws), or where this is not possible, report on the content of each complaint.</li> </ul>	On a quarterly basis and for each quarter as soon as practicable but no later than 10 business days following the end of the quarter.

Section 994F(6) of the Act requires distributors to notify the Issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning.

The Issuer will rely on notifications of significant dealings to monitor and review the Fund Product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.

Dealings outside this TMD may be significant because:

- they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the Fund Product, or
- they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer).

In determining whether a 'significant dealing' has occurred, La Trobe Financial expects that the following non-exhaustive list of factors may be relevant for distributors:

- the nature and risk profile of the Fund Product;
- whether a consumer outside of the target market has acquired the Fund Product;
- the extent to which the acquisition of the Fund Product by the consumer outside of the target market has the potential to harm or has caused harm (including the amount of any financial loss); and/or
- the nature and extent to which the distribution of the Fund Product is inconsistent with the TMD.

The above list is not exhaustive and distributors should consider, having regard to the circumstances of their business, whether other factors or events may suggest that a significant dealing has occurred. A significant dealing may be identified through the distributor's product governance arrangements, as a result of a consumer complaint or the occurrence of a Review Trigger.

3. The Joint ASFA/FSC Guidance Paper on Standard Risk Measures provides a seven-level classification system intended to provide granularity to investors. The Standard Risk Measure is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return (including under conditions of market stress) or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. The SRM methodology may be supplemented by other risk factors.
